

## Advanced Film/Broadcast News (NTV)

This class is the capstone of all of the production classes. Students will function in a true production environment as they are involved in the production of the school's weekly news show. Students organize, produce, and create segments for broadcast. Film production is another facet of this class, as students will create their own short films for student film competitions and local distribution. Lastly, students create "video yearbook" chapters that cover the groups and events that take place at NHS.

**Prerequisite:** Teacher Recommendation, production reel, interview.

**Year Long Course (10 credits) plus Thursday night lab time 4-9pm**

**UC/CSU a-g approved – F College Preparatory Elective**

**Homework Time:** Some nights and weekends required for productions and events.

## Students who are interested in these courses:

- Have interests in film, broadcasting, visual storytelling and composition
- May be interested in pursuing a career in the film or broadcast industry
- Enjoy hands-on learning

# FILM AND BROADCAST PROGRAM

Beginning Video Production  
...  
Art Of Television  
...  
Advanced Film/Broadcast News

## Art Of Television

This course prepares students to enter the video production industry with an emphasis in pre-production and post-production techniques. Students will learn about the development of the film and television industry and study the techniques used by filmmakers and broadcasters. Training includes production planning, and advanced editing, and camera operation techniques. The Adobe Suite of editing products will be used.

**Prerequisite:** Beginning Video or Teacher Recommendation

...  
Year-long course (10 credits)

...  
NHS General Elective

...  
**UC/CSU a-g approved – F College Preparatory Elective**

...  
**Homework Time:** Limited to occasional outside productions

## Work We Do

Students will...

- Learn about and create different types of films and visual productions
- Get hands-on experience with both production and post production equipment.
- Work collaboratively in groups to prepare films/broadcasts for class, local broadcasts and festivals.

## Beginning Video Production

Students will learn foundational production techniques including camera operation, audio acquisition, lighting techniques, editing, and visual storytelling. This is a hands on class that allows students to be creative and to learn the fundamentals of, film, documentary, commercial and feature production.
