

New Course!

AP Psychology

What is the class about?

The course challenges students to apply research methods and psychological theories to real-world scenarios, fostering a deeper understanding of how we think, feel, and interact with others.

Interesting topics we will discuss:

- What makes me attracted to my crush?
- Why do I care so much about what other people think?
- How do stereotypes influence behavior, perception, & social interactions?
- Why did doctors cut patients' brains to treat mental illness?
- What are the symptoms of depression and anxiety?

The basics:

Who: Open to Juniors and Seniors

Instructor: Ms. Comtois
