## Course Description

Computer Graphics and Design *(open to ALL students)*
Intro to Computer Graphic Design is a beginning course that explores how to utilize artistic elements and principles of design in computer graphic software and media. Students will create various projects such as Magazine Covers, Movie Posters, Travel Guides, Video Game Booklets, Business Cards, and Restaurant Menus. The class is designed to allow students the opportunity to learn various graphic and desktop publishing software programs such as Photoshop, InDesign and Illustrator. This course is a great course for any student and will help students be able to understand layout and composition that benefits them in all of their other subjects.***(1 year course)***

Students who are interested in this course:

- Have interests in computer graphics, graphic design, advertising, animation. May be interested in careers in advertising and commercial design.

- Enjoy designing and editing photos. Creating advertisements. Commercial art.
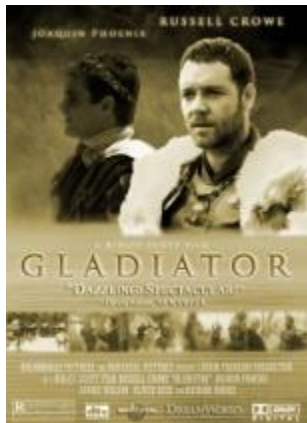

COMPUTER GRAPHICS
