

Course Description

Intermediate Computer Graphics is designed to allow students the opportunity to learn animation techniques for the web using Flash, Quicktime, Swift 3D and DreamWeaver. Students will incorporate these and other software programs into learning and understanding web page construction and design. Students will also learn how to create animated website Banner Ads, Product Ads, Movie Trailers, and Television show web promos. This course will be a catalyst for future advanced classes concentrating on website construction, design, and purpose in today's society. (1 year)

Students who are interested in this course:

- Have interests in computer graphics, website design, advertising, animation. May be interested in careers in advertising and commercial design.
- Enjoy designing websites. Creating advertisements. Commercial art.
- Cartooning and Animation
- Architecture and 3D modelling

INTERMEDIATE COMPUTER GRAPHICS
