

Course Description

Classes guide students through an in depth exploration of photography as an art form as well as the techniques of professional photography. Students will learn basic and advanced camera functions as well as the rules of composition. The foundations of digital image editing and manipulation are introduced and extensively explored.

Students who are interested in these courses:

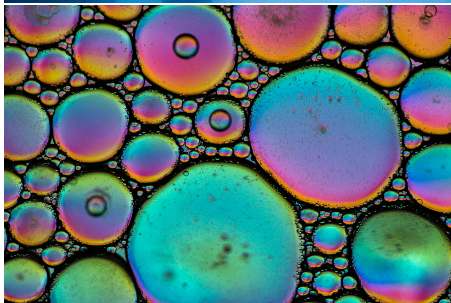

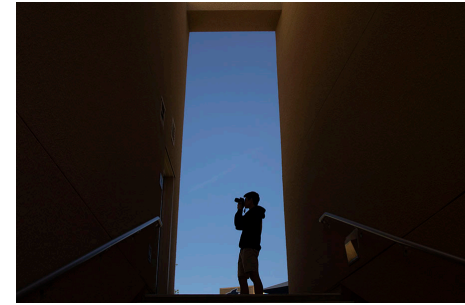

- Have a desire to express themselves visually
- May be interested in a career as a professional photographer
- Want to work independently on a personal project potentially receiving College coursework credit.

PHOTOGRAPHY

Visual Imagery

Adv. Visual Imagery

AP 2D Art & Design
