

Maker's Studio Elective Mrs. Leys

Exercise your creativity, enhance your visual literacy skills, and learn how to craft cool stuff in the Maker's Studio class. Students work independently to complete self-directed projects with teacher support. We have tools and supplies for jewelry making using jewelry wire, polymer clay, metal fabrication, and resin. Students can also learn knitting, crocheting, sewing, sticker making and more. The class is supportive of students' mental health as they have time to "play", engage in mindful activities, and can either talk with other students, or work quietly and take a break from interaction with others. Learning new skills in a low pressure environment also builds strengths such as self-compassion, perseverance, resilience, confidence, and competence.
