Writing Music
Music theory website used for online lessons and exercises - this is a free site and students do not need to sign up for an account
For my Music Theory class, some of the kids elect to use a web-based music notation software (either Noteflight.com or musescore.com) to compose their final projects. Up until last year, students could access these without signing up for an account. However, now both require logging in, even though they are both still free. However, this is not required, and the pieces can be composed without using this software.
People can subscribe and it is used to send out our boosters' periodic newsletters
a web and mobile application that allows users to create a cartoon of themselves and their friends
a tool loaded with enough easy-to-use features and functionality that anyone can create a variety of engaging content that gets shared
Language learning through verb and vocabulary practice.
Textbook website for ASL 1, 2, 3.
a freemium language-learning platform that includes a language-learning website and app, as well as a digital language proficiency assessment exam. Duolingo offers all its language courses free of charge.
An assessment tool where students can type, draw, or submit images to demonstrate their understanding.
Website which has songs and lyrics where students can practice their speaking skills with karaoke videos with blanks. Has a variety of levels of difficulty of videos.
Textbook website for the Bien Dit series used by French 1, 2, 3.
Textbook website for the Realidades series used by Spanish 1, 2, 3; Conexiones series used for 4Honors; Encuentros Maravillosos used for AP Spanish.
a web-based infographic application which allows users without intensive experience as graphic designers to easily create professional-grade infographics using themed templates
Create your own study sets, flashcards and games
the leading Spanish translator, dictionary, and conjugator trusted by more than 10 million people each month.
An educational tool that allows users to create their very own talking character.
a site that allows users to select a video and customize it by editing, cropping, recording audio, and adding questions to make an engaging presentation or lesson

A virtual wall that allows people to express their thoughts on a common topic easily. It works like an online sheet of paper where people can put any content (e.g. images, videos, documents, text) anywhere on the page, together with anyone, from any device.
Create and conduct student-paced formative assessments in a fun and engaging way. We are using as an assessment tool for gathering data about student progress on learning targets.
PDF reader/writer/document annotation for Chromebook
Workflow for projects
